2021 Annual General Meeting - AGENDA

President's Report:

Hello everyone, the past couple of years has been a roller coaster ride for so many of us in the horse industry. The fires and the drought in the interior and then the floods on the lower mainland, climate change took it's toll on a lot of us in 2021.

But in the end not all was lost, the BC chapter and it's member's prevailed. We managed to have mare inspections in the lower mainland, the interior and in the north of BC as well we had some very nice stallions that were inspected and we held our foal futurity.

On behalf of the BC chapter I would like to thank everyone who helped out at these events, the volunteers who set up the arena's the night before, the inspectors for the countless travelled miles, those members that brought their horses and foals and the generous barn owners and managers who offered their indoor facilities at no extra cost.

Let's hope this year 2022 will be a better year for all of us.

Julie Pilon
President of the BC Chapter (CWHBA)
