

My name is Avery Caine and I am a 19 year old from Rockwood, Ontario. I am currently in my second year at Hartpury University (located in the UK) studying a BSc in Equine Performance and Rehabilitation. I am grateful to have had the opportunity of growing up on our family farm, CJ Equestrian Centre and have gained valuable experience handling and riding young off the track thoroughbreds, competition horses and everything in between. We also breed Warmbloods, so I continue to expand my knowledge on equine pregnancy and gain first hand experience of the birthing process. I own 3 of my own horses and have competed up to the 1.0m/1.10m level in show jumping. Currently I have my 5 year old Thoroughbred Calypso with me at University who I am retraining in hopes of one day eventing her. I first got involved with Canadian Warmblood at an equi-tots clinic in 2021 which piqued my interest in that area of the industry. From there, I represented Canada in the Netherlands at the 2022 IYB Championships. At the last competition I gained a lot of valuable insight and have been working hard to address my strengths and weaknesses. I am grateful to have the opportunity to be a part of the 2024 team and I cannot wait to work alongside my teammates and represent Canada in Denmark.
