

My name is Hailey, and I am a 23-year-old from Guelph, Ontario. I first became involved with the CWHBA and its Young Breeders Program in 2024, when I was a member of the senior team. I am now looking forward to continuing my education ahead of the 2026 World Championships. My equine experience is primarily in the discipline of eventing; however, I have also dabbled in dressage and showjumping as well. I hope to use the experiences and knowledge gained as part of the Young Breeders Program moving forward in my riding career, as I hope to eventually be able to breed some of my own competition horses. In addition to my riding, I am currently doing a master's in molecular and cellular biology at the University of Guelph.
